### Payload: 30 kg

#### Compact, Lean and Powerful Arm

7-axis actuator-based design and bestin-class wrist performance characteristics provide amazing freedom of movement, coupled with ability to maneuver in very tight areas.

e.

- Superior dexterity enables robot to reorient elbow(s) without affecting hand position or causing self-interference.
- Agile, versatile robot opens up a wide range of industrial applications to robots: ideal for assembly, injection molding, inspection, machine tending and a host of other operations.
- 30 kg payload; 2,597 mm vertical reach; 1,485 mm horizontal reach; ±0.1 mm repeatability.
- Slim, compact and powerful robot can straighten vertically to take up a very small footprint and is only 365.5 mm wide at widest point.
- Short axis lengths and extreme motion flexibility allow slim manipulator to be positioned out of normal working area (floor-, ceiling-, wall-, incline- or machinemounted).

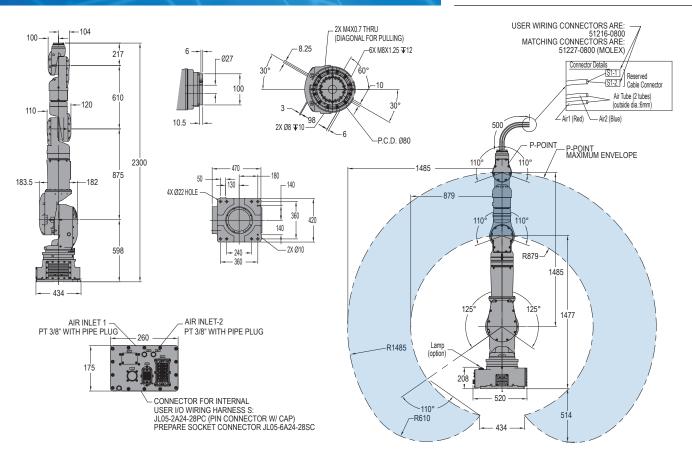

- Mounting SIA30D robot between two machine tools provides open access to machines for fixture maintenance, adjustment or testing.
- Operator has clear access to machine operator station for entering offsets, maintenance or other operations.

#### DX100 Controller

- Patented multiple robot control supports up to 8 robots/72 axes.
- Windows<sup>®</sup> CE programming pendant with color touch screen and USB interface.
- Faster processing speeds for smoother interpolation. Quicker I/O response. Accelerated Ethernet communication.
- Extensive I/O suite includes integral PLC and touch screen HMI, 2,048 I/O and graphical ladder editor.
- Supports all major fieldbus networks, including EtherNet/IP, DeviceNet, Profibus-DP and many others.
- Compliant to ANSI/RIA R15.06-1999 and other relevant ISO and CSA safety standards. Optional Category 3 functional safety unit.
