- Highly versatile, this 4-axis robot is ideal for a variety of palletizing applications, order picking and other logistical tasks for end-of-line or distribution center automation.
- Extensive 3,024 mm vertical reach, combined with 3,159 mm horizontal reach, provides ability to build 102 in. tall trailer-high loads on standard 48 in. x 40 in. pallet.
- Hollow wrist provides a wide range of wrist motion without interference.
- T-axis features high allowable moment of inertia; asymmetric loads are handled effectively without compromising speed or performance.
- Internally routed airlines and cables from base to end-of-arm tool maximize reliability.
- Cable installation tube in robot base facilitates fieldbus routing to the upper arm and/or gripper.
- NSF-H1 certified food-grade lubricant option available for food or consumer product packaging environment.
- Available with PalletSolver®, Yaskawa Motoman's operator-friendly palletizing software suite for fast and easy creation of palletizing patterns.
 - PalletSolver's offline pattern generation tool with intuitive graphical interface allows quick changeovers without halting production.
 - Highly customizable to each palletizing system.
 - Directly imports pallet patterns generated in widely-used TOPS® or CAPE software.
